(54) Title: METHOD FOR PROVIDING A HINGED GUARANTEE CLOSURE, A HINGED GUARANTEE CLOSURE AND CONTAINER WITH A HINGED GUARANTEE CLOSURE

(57) Abstract: A hinged guarantee closure is produced by being injection moulded in the closed state, i.e., with a guarantee seal. The closure is injection moulded with an associated ring member (13) for connection to the container (17) on which the closure is to be used. The ring member (13) is separated from the rest of the closure (11, 12) by an axial gap (21) which is spanned by a hinge portion (15) and a guarantee connection (16). The closure comprises a cap (1) with an integral closing member (12) for cooperation with an opening (19) in the container (17).
